

Start **Backend server**
from the project folder::

```
$ cd "project 1"
```

```
$  
scripts/run_dashboard.sh
```

The screenshot shows the Visual Studio Code interface. The Explorer panel on the left displays the file structure of the 'B1_BUILDERS_PROJECT'. Under the 'project 1' folder, the file 'run_dashboard.sh' is highlighted. A yellow arrow points from this file to the Terminal panel at the bottom. The Terminal panel shows the command prompt with the command 'scripts/run_dashboard.sh' entered. The README.md file is open in the background, showing instructions for running the backend server.

```
project 1 > README.md > abc # Geopolitical Market Forecaster > abc ## Demo  
1 # Geopolitical Market Forecaster  
41 ## Demo  
43 From the project folder, start the backend  
server:  
44  
45 ```bash  
46 scripts/run_dashboard.sh  
47 ```  
48  
49 Open the dashboard:  
50  
51 ```text  
52 http://127.0.0.1:8000/dashboard  
53 ```  
54  
55 What the demo is showing:  
56
```

PROBLEMS TERMINAL ... bash - project 1

```
(.venv) sthiagar@sthiagar-Standard-PC-Q35-ICH9-2009:~/Desktop  
p/B1_Builders_Project/project 1$ scripts/run_dashboard.sh
```

**1. run script on CMD line
scripts/run_dashboard.sh**

Backend server has started.

Open the dashboard in browser.

```
(.venv) sthiagar@sthiagar-Standard-PC-Q35-ICH9-2009:~/Desktop/B1_Builders_Project/project 1$ sc
ripts/run_dashboard.sh
INFO: Started server process [19062]
INFO: Waiting for application startup.
INFO: Application startup complete.
INFO: Uvicorn running on http://0.0.0.0:8000 (Press CTRL+C to quit)
```

**2. ctrl + click link
to open dashboard in browser**

1. command line – shows connection open with browser and backend server.

2. In browser Dashboard is shown to use Openai. More on this further up.

The image shows a web browser window displaying the 'Sector Decision Dashboard' and a terminal window below it showing the command-line execution of the dashboard script.

Browser Window:

- Address bar: `http://0.0.0.0:8000/`
- Page Title: **GEOPOLITICAL MARKET FORECASTER**
- Section: **Sector Decision Dashboard**
- Header: **2. Dashboard is using OpenAI to analyze news and generate market-relevant insights.**
- Status: **Analysis: openai CONNECTED** (highlighted with a yellow circle)
- Section: **Market decisions from geopolitical news**
- Primary Entity: **Seatrium**
- Associated Exposure: **Marco Polo Marine**

Terminal Window:

- Terminal Title: `bash - project 1`
- Command: `(.venv) sthiagar@sthiagar-Standard-PC-Q35-ICH9-2009:~/Desktop/BI_Builders_Project/project 1$ scripts/run_dashboard.sh`
- Output:
 - `INFO: Application startup complete.`
 - `INFO: Uvicorn running on http://0.0.0.0:8000 (Press CTRL+C to quit)`
 - `INFO: 127.0.0.1:52256 - "GET / HTTP/1.1" 200 OK`
 - `INFO: 127.0.0.1:52256 - "GET /api/dashboard HTTP/1.1" 200 OK`
 - `INFO: 127.0.0.1:52256 - "WebSocket /ws/alerts" [accepted]`
 - `INFO: connection open` (highlighted with a yellow circle)

1. connection open in CMD LINE

AGENT WORKFLOW

- 1. Scraper Agent:**
collects and normalizes market-relevant news.
SCRAPER AGENT
Captured 7 source-linked signal(s).
- 2. Economic Analyst Agent:**
creates market-oriented insights.
ECONOMIC ANALYST AGENT
Found oil supply and maritime-risk themes.
- 3. Predictor Agent:**
creates bounded forecasts from insights.
PREDICTOR AGENT
Mapped risk premium to sector upside.
- 4. Governor Agent:**
performs basic post-forecast governance checks.
GOVERNOR AGENT
Evidence-linked signal; verify market data before any real trade.

The Scraper Agent collects the relevant news below based on criteria -

- Middle East geopolitical events
- Oil supply or oil price risk
- Shipping disruption
- Aviation disruption
- Regional instability or conflict
- News that may affect sectors like Offshore & Marine or Airlines

To stop the backend server.
Press ctrl + c in command line.

The image shows a terminal window with a dark background. At the top, there are tabs for 'PROBLEMS', 'OUTPUT', and 'TERMINAL', with 'TERMINAL' being the active tab. To the right of the tabs, there is a title bar that says 'bash - project 1' followed by standard window control icons (plus, minus, close). The terminal content shows a user prompt '(.venv) sthiagar@sthiagar-Standard-PC-Q35-ICH9-2009:~/Desktop/B1_Builders_Project/project 1\$' followed by the command 'scripts/run_dashboard.sh'. Below this, several lines of output are shown, each starting with 'INFO:'. The first line says 'Waiting for application startup.', the second says 'Application startup complete.', and the third says 'Uvicorn running on http://0.0.0.0:8000 (Press CTRL+C to quit)'. The URL 'http://0.0.0.0:8000' is underlined in yellow. The fourth line shows a log entry '127.0.0.1:50952 - "WebSocket /ws/alerts" [accepted]' and the fifth line says 'connection open'. At the bottom right of the terminal, there is a yellow text overlay that reads 'press < CTRL + C > in CMD to Quit.'

```
(.venv) sthiagar@sthiagar-Standard-PC-Q35-ICH9-2009:~/Desktop/B1_Builders_Project/project 1$ scripts/run_dashboard.sh
